Second International Workshop on Machine Ethics
University College Dublin, Ireland
30\textsuperscript{th} June 2020
Challenges of Regulation of AI

In legal provisions

In standards and ethics guidelines
Corporations or Individuals?

Who is to blame when laws are breached?

Who will confirm that standards and ethics guidelines have been complied with?
Could Regulating the Creators Deliver Trustworthy AI?

“Can you imagine just anyone being allowed to operate on other people? Or someone being allowed to sell medicine without a pharmacist’s licence? Or someone who’s not an architect being allowed to put up a building?”

Fernando Carrera
Professor at the Galician School for the Conservation and Restoration of Cultural Heritage
Regulation of Professions

Why are we not regulating (certain) computer scientists?

What might be the knock on effect of regulating certain computer scientists?
Could Regulating the Creators Deliver Trustworthy AI?
